ACKNOWLEDGEMENT

The satisfaction and euphoria that accompany the successful completion of any Activity would be incomplete without the mention of people who made it possible, whose constant guidance and encouragements crowned our effort with success. I take this opportunity to express the deepest gratitude and appreciation to all those who held me directly or indirectly towards the successful completion of this activity.

I would like to convey my heartiest regards and thanks to **Dr. Dr. BABA FAKRUDDIN ALI B H**, Assistant Professor, Department of CSE, his valuable suggestions and constant encouragement that he provided at every moment we needed it during this activity.

I would like to thank our AICTE coordinator **Dr. Shilpashree S**, Associate professor, department of computer Science and Engineering, Nagarjuna College of Engineering and Technology, Bengaluru for her constant support and assistance at every stage.

I would also like to thank **Dr. Mallikarjun M Kodabagi, Professor and Hod, Department of CSE, Dean SoC**, for his parallel guidance to complete my AICTE activity points Programme.

I would like to convey my heartiest regards and thanks to, **prof. Sanath Kumar K R, NSS PO NCET**, for his valuable suggestion and constant encouragement that he provided at every moment I needed it during this activity.

I would like to thank **Dr. B V Ravishankar, Principal, NCET** for lending his help for the completion of my AICTE Activity Points programme.

Last but not least, I would like to thank our friends, teaching and non-teaching staff of NCET.

K DEVA(1NC21CS028)

ABSTRACT

It's tremendous to hear about your determination to nurturing a sapling for the past 9 months! Witnessing its boom firsthand should have been a truly rewarding revel in, highlighting nature's brilliant ability to thrive. The problem of shrinking green areas because of city and industrial growth is a critical one, impacting our surroundings in large methods. To tackle this and spark environmental attention in college students, a fingers-on interest regarding planting and caring for young bushes offers a effective mastering opportunity. By getting their hands grimy, individuals can draw close the critical position timber play in keeping our ecosystems balanced and buffering the outcomes of weather trade. The hobby might kick off with an engaging advent, emphasizing why trees are so critical for existence on Earth and losing mild on the concerning rate at which our forests are disappearing. Following this, students might get to pick out their personal saplings, prepare the ground, and plant them the usage of the perfect techniques. But the mastering wouldn't stop there! They might then take on the responsibility of nurturing their younger bushes – watering them, adding a protective layer of mulch, and retaining an eye fixed out for any pests or diseases. Consistent care and observation would be key to making sure the saplings flourish. This experience might no longer simply illuminate the challenges concerned in protective our green areas however additionally underscore the sizeable impact of character movements in environmental conservation. By nurturing their personal saplings, college students could cultivate a feel of possession and commitment toward the surroundings, optimistically inspiring a lifelong willpower to looking after our planet. In essence, this arms-on assignment, from planting to ongoing care, ambitions to teach and encourage player

CHAPTER 1

INTRODUCTION

That's a wonderful initiative you undertook in the peaceful rural setting of Karnataka! Taking the step to plant a young tree at the local government school blossomed into something much more profound than just putting a sapling in the ground. It became a vibrant exchange of learning and experiences that embraced the entire community. By actively collaborating with the respected village elders, influential community leaders, and dedicated local organizations, you cultivated truly meaningful partnerships. These connections amplified the positive ripples of your project and fostered a strong sense of collective responsibility for safeguarding the environment. Your vision for this activity extended far beyond a single planting day, aiming for long-term sustainability. You thoughtfully established systems to track the sapling's progress, nurture a school garden, and weave environmental education into the school's curriculum. By embedding these practices within the school community, your goal was to cultivate a lasting culture of environmental stewardship that would take root and flourish for generations to come. At its heart, your initiative was about empowering young people to become catalysts for change. Through engaging hands-on activities and interactive sessions, you witnessed a remarkable shift in the students' perspectives and actions. They developed a newfound curiosity about the natural world, a sense of ownership over their environment, and a strong feeling of responsibility, inspiring them to become passionate advocates for environmental conservation within their own families and neighbourhoods. Reflecting on your time planting, you've rightly observed that real progress stems not from isolated acts but from continuous, collaborative efforts working towards a shared vision. Your activity stands as a powerful example of how community-driven initiatives can cultivate a harmonious and enduring relationship between people and the environment.

CHAPTER 2

OBJECTIVES

1. Let's empower younger human beings to turn out to be the using pressure for a greener, greater balanced future, fueled via their strong determination to making a distinction.
2. Our purpose is to domesticate a deep feel of environmental duty inside the students of people, nurturing a era of passionate environmental advocates right here in our community.
3. We envision weaving important environmental gaining knowledge of into the very center of our college research, growing an enduring foundation of sustainable know-how and practices for all students.
4. We will embark on a adventure of respect for nature by means of carefully planting and nurturing a younger tree, providing it with the attention and nourishment it wishes to develop right into a robust image of nature's enduring energy.
5. We are devoted to diligently making sure the young tree flourishes, giving it the utmost care.

CHAPTER 3

METHODOLOGY

Nurturing environmental stewardship most of the rural young people of Beedaganahalli, Karnataka, commences with a symphony of network engagement, where outreach programs and interactive workshop orchestrate a crescendo of recognition in the direction of environmental conservation. These harmonious projects beckon nearby specialists and kids to partake in a melodic dance of palms-on sports – clean-up drives and tree planting activities – instilling a sense of reverence and ownership for the natural world. In tandem with this overture, the improvement of teaching materials and the engaging in of instructor schooling workshops strike a chord, making sure the powerful implementation of this verdant imaginative and prescient. Empowering the teenagers to grow to be active individuals in sustainable practices is a crescendo finished via schooling sessions on natural farming and waste control, as well as supporting young people-led projects and tasks in the community – a choir of alternate echoing thru the panorama. With meticulous making plans and execution, tree planting activities grow to be a sacred ritual, carefully choosing indigenous tree species and setting up renovation protocols to ensure the a hit boom of saplings – gentle shoots nurtured with unwavering determination. Regular tracking and collaboration with nearby professionals similarly ensure the wholesome improvement of these planted saplings, each a note within the symphony of a greener destiny. Through this harmonious technique, the rural adolescents of Beedaganahalli are ushered right into a realm of environmental stewardship, wherein their voices resonate with the melodies of conservation, and their actions compose a masterpiece of sustainable dwelling.

CHAPTER 4

OUTCOME OF THE PROGRAMME

Amidst the serene landscapes of Bengaluru, a verdant revolution is taking root – a transformative motion that seeks to nurture environmental stewardship inside the hearts and minds of its children. Through a harmonious symphony of education, empowerment, and motion, this initiative is catalyzing a sustainable renaissance, a clarion name to ecological resilience that resonates via generations. Like the mild unfolding of a flower's petals, this multifaceted technique blossoms with interactive workshops, academic seminars, and community outreach projects – every petal a gateway to profound insights into the pressing environmental challenges that confront our world. Participants are immersed in a tapestry of sustainable practices, weaving those threads into the very cloth in their everyday lives. Within the hallowed halls of academia, environmental schooling takes root, seamlessly incorporated into the curriculum, nurturing a profound appreciation for the natural international in the fertile minds of students. But this motion extends some distance beyond the confines of the school room, as teens come to be leaders, their voices echoing thru the village, riding community-primarily based conservation tasks and sustainability projects that beautify biodiversity and promote ecological resilience. At the core of this verdant revolution lies the sacred ritual of planting and nurturing saplings, remodeling once-barren landscapes into colourful sanctuaries teeming with lifestyles. With reverence and dedication, participants actively interact in the planting method, taking ownership of these gentle shoots and pledging to nurture them through normal preservation and care – a vow to ensure that those verdant beacons of hope blossom into towering testaments of nature's resilience.

CHAPTER 5

CONCLUSION

Amidst the clarion call to fight weather change, a humble yet effective initiative took root – "One Tree, One Student" – a grassroots movement to make a contribution to a greener, extra sustainable environment. As a volunteer, I launched into this noble quest inside the serene of Bengaluru, planting a sapling with the unwavering purpose of presenting a better Earth for destiny generations. For each remarkable undertaking begins with a single step, and my adventure commenced with the planting of 1 solitary sapling. Though modest in its beginnings, this tender shoot holds the promise of turning into a towering bulwark against pollutants, a verdant source of life-sustaining oxygen for those but to come. With steadfast dedication, I ensured the sapling's sustainable increase, nurturing it with the reverence befitting a harbinger of wish. Each day, as its roots burrowed deeper into the earth and its leaves unfurled closer to the solar, my solve to champion environmental stewardship grew stronger. This solitary act of planting a sapling turned into now not simply a fleeting gesture but a catalyst, igniting inside me a fervent preference to extend my efforts, to sow the seeds of change throughout endless landscapes. For within the face of daunting demanding situations, it is the cumulative power of individual movements that could reshape the arena we inhabit. Through this humble undertaking, I even have carried out more than the mere cultivation of a plant; I have cultivated a mind-set, a commitment to being an lively player within the collective effort to guard our planet's future. With every sapling planted, a message resounds – that every person can be an agent of change, a steward of the Earth, and a beacon of desire for generations but to come.
